

Spell Ledger Pro

AI powered accounting and operations platform

Run accounting, HR, and inventory in one connected system with practical automation for faster decisions and cleaner controls.

Built for modern finance teams

Create invoices, manage bills, reconcile banks, run payroll, track inventory, and monitor performance with dashboards designed for operational clarity.

Accounting core General ledger, payables and receivables, invoicing, vendor bills, reconciliation, and financial statements.	AI Copilot Ask questions, get summaries, and trigger guided actions with role boundaries and approval control.
Automated communications Send invoices, receipts, pay slips, purchase orders, reminders, and workflow notifications with templates.	HR and payroll Employee profiles, onboarding, attendance, leave approvals, payroll runs, and performance workflows.
Inventory and purchasing Multi-warehouse stock, low stock alerts, purchasing workflows, receiving, fulfillment, and movement history.	Help Center In-product help articles and search so teams onboard quickly and self serve common questions.

Modules and outcomes

A clean system of record that improves close speed, reduces manual work, and supports leadership reporting.

Core modules

Accounting

- Invoicing and billing
- Bank reconciliation
- Profit and loss, balance sheet, cash flow

Human Resources

- Onboarding and employee directory
- Attendance and leave
- Payroll runs with pay slips

Inventory

- Product catalog and stock visibility
- Multi-warehouse and low-stock alerts
- Purchase to receive to bill flow

What teams gain

- Faster month-end close with fewer manual steps
- Consistent workflow handoffs from purchasing to payment
- Operational visibility for leadership and managers
- Role-based access and controlled approvals
- Clean audit trails for sensitive actions
